Class 8

Loops in C:

official loops
1. for ⎱
2. while ⎰ Famous
3. do.. while

Unofficial loops.

4. goto

5. Recursion.

For loops - traditional for loop.   i < 10 ; i = 6

for - keyword

true = 1
false = 0

for (initialization; condition; updation)

{

=

}

Full pyramid :

→ How much space to leave.

① Generat odd nums

② print that Much stars with req. spaces.

$$\text{Odd Numbers}$$

$l = 4$ ~~stars~~ — $l - 1$ spaces.

for $l = 4$, $l - 1$ spacer.

Goto statement in C:

-> Dangerous statement.

lable:

goto lable:
